

BOAT REFURBISHMENT SERVICE

We have two levels of Boat Refurbishing Service - the Hull Only Service and the Complete Boat Service.

The Hull Only Service cleans the boat, checks the hull & fittings, repairs any minor hull defects, touches up the tops (canvases and inside) and resprays the outside of the hull. After respraying, the boat is carefully rubbed down and polished to bring the surface back to very nearly new!

The Complete Boat Service is a total overhaul of the boat from bow to stern. It includes a complete check of the hull - inside and out. We then do any minor repairs to the hull and respray the whole - inside and out. All fittings are put back on, replacing any that we have agreed with you need replacement. After respraying the boat is carefully rubbed down and polished. Your boat will come back to you looking fantastic and ready to go!
